- Acoustic noise level: < 30 dBA

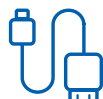

Key features

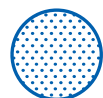

Portable – Easy for travel

Ultra light and silent

Rechargeable by USB-C

Stainless steel mesh

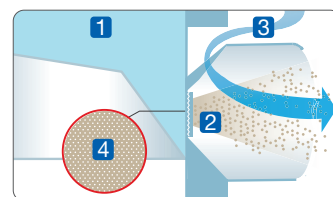

Auto off

Automatic switch-off

Efficient Nebulisation System

- 1 Medication (prescription only).
- 2 Aerosol of medication: 5 µm, capable of penetrating the drug quickly and deeply into the lungs.
- 3 The mesh operates with a high frequency vibration which helps to deliver the medication quickly and helps to shorten the therapeutic session.
- 4 Mesh:
 - High anti-oxidized mesh delivers stable particles whilst providing a longer lifetime for the device.
 - High vibrating frequency (approximately 103 kHz ± 10%) increases the nebulisation rate.

Fully equipped

- With adult and child face masks, mouthpiece and carrying bag
- Easy storage and transportation
- Intuitive design for comfortable filling of medication
