

Thermogard XP Temperature Management System Specifications

ZOLL's Thermogard XP® (TGXP) Temperature Management System provides the power and control you need to rapidly, safely, and effectively manage the core body temperature of critically ill or surgical patients.¹⁻⁴

ZOLL combines precise temperature management with the critical care functions of a standard central venous catheter (CVC). Cool or warm saline circulates through the catheter in a closed loop, quickly cooling or warming the patient as venous blood passes over the balloons, without infusing saline into the patient.

Experience the benefits of Thermogard XP:

- Rapid and precise core body temperature management
- System automatically maintains target temperature within $\pm 0.2^{\circ}\text{C}$
- Easy to use
- Multifunction catheter doubles as a central venous catheter (CVC), adding vital functionality to a line that is already placed
- Software enables real-time temperature display, data storage and download
- Reduces nursing workload by 74%⁵ — no need to constantly monitor temperature, manage shivering, check pads, etc.
- Enables unhindered patient access

View current patient and system data on the display or synchronize with your hospital monitor.

Track patient and system data and electronically transfer to the patient's file.

Start-up Kit

Tubing set, including heat exchange coil, air trap, and roller pump tubing.

ZOLL Medical Corporation
Worldwide Headquarters
269 Mill Road
Chelmsford, MA 01824
978-421-9655
800-804-4356

Dimensions

Height: 45 in (114 cm)
Width: 17 in (43 cm)
Depth: 30 in (76 cm)
Weight: 115 lbs (52 kg)

Electrical Configuration:

100-120 VAC, 50/60 Hz, 5A
220-240 VAC, 50/60 Hz, 2.25A
Voltage: 115 V, 230 V
Fuse Protection:
T6.3A (slow blow) 5 x 20 mm

Environmental

Operating Temperatures:
10°C – 27°C (50°F – 81°F)
Operating Humidity:
30 to 75% noncondensing
Atmospheric Pressure:
70 kPa to 106 kPa

Chiller and Heater

Reservoir Volume:
2.0 liters (0.5 gal)
Pump Capacity:
7 lpm at 0 m head (0 ft)
Temperature Range:
0°C – 42°C
Refrigerant: HFC 134a

Controller and Display

Screen Display:
6.4 in. (16.25 cm) LCD
color VGA
Controls:
Push buttons and knob
Temperature Input:
Thermistor, YSI-400 series
Articulation:
180° swivel, 45° tilt
Data Interface:
Serial RS-232C, 9-pin
sub-D connector
Alarms:
Audible tones and displayed
text messages
Displayed Temperature Range:
26°C – 42°C
Displayed Temperature Accuracy:
± 0.2°C

Saline Coolant Circuit

Priming Volume: 200 ml
Heat Exchanger: Disposable
stainless steel coil
Priming Source: Sterile saline
solution (hospital provided)
Patient Connection: Directional
Luer connections on 72-in.
(183-cm) lines
Pump tubing: Roller pump
compatible with directional fittings
Sterility: Gamma sterilized
Saline alarm: Reservoir-level
detection and alarm system
Coolant Circuit Operating Life:
Replace disposable components
after seven (7) days of continuous use

Equipment Classifications

**Type of Protection Against
Moisture:** Ordinary
**Type of Protection Against
Electric Shock:** Type BF for
temperature inputs
Type B for catheter connections
Protection Class: 1
Mode of Operation: Continuous

Approved Patient Temperature Probes

Temperature Probe Standard:
YSI-400
**YSI-400 temperature probes
verified to work with the system:**
Mallinckrodt Medical Foley Probe 8F
(200818-001)
Mallinckrodt Medical Foley Probe 10F
(200818-002)
Mallinckrodt Medical Foley Probe 12F
(200818-003)
Mallinckrodt Medical Foley Probe 14F
(200818-004)
Mallinckrodt Medical Foley Probe 16F
(200818-005)
Mallinckrodt Medical Foley Probe 18F
(200818-006)
Mallinckrodt Medical GP/Rectal
Probe 9F (200820-001)
Smith Medical Foley Probe 10 FR
(600244-001)
Smith Medical Foley Probe 12 FR
